Life period of "golden age" ,
benefit the life.

idea

To do an ideal
education, to be a
first class school

vision

strategy

Curriculum construction
Reform of learning method
brand building

The School Philosophy

The school will strive to become the junior high school with future school characteristics (do "the school with future" is to train and bring up socialist builders and successors with character to serve the construction of socialist modernization and the creation of learning, and with the ability to learn and create all-round development), let the students' three years of study become the life period of "golden age" , and the knowledge and ability could "benefit their life" (and future).

Our Common Vision: to do an ideal education, to be a first class school (to make every individual of the school get moderate educational development; to make the parents and teachers of the society satisfied with school)

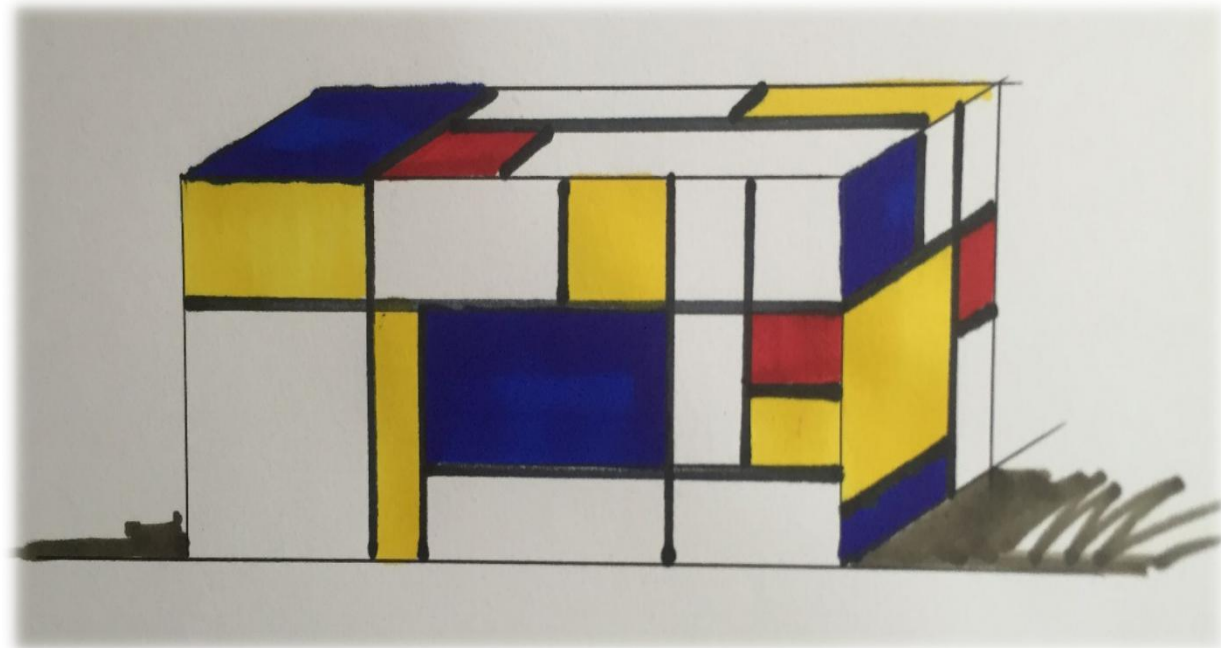

The Way We Work: teamwork; excellence

Challenge ourselves, embrace first

To be a straight person, deal with things smoothly

Fangzheng Shi

Our Development Strategy

Taking school curriculum as the carrier to build a more suitable education for students' sustainable development; taking learning method as the starting point to construct more suitable education for students' development; taking brand building as a driving force to build the school into a high quality school in the region.

Our Main Actions

According to the current situation of school, we decide to promote “teacher training” to enhance the strength of the school; reinforce “the teaching training” to improve the quality of teachers; promote the “one subject more types” to improve the classroom efficiency; speed up the “open communication” to expand school influence; “develop community” to comprehensive core literacy; implement “wisdom education” to conform educational development; implement “cultural construction” to promote the school development.

Students' moral education goal: to be a straight person, deal with things smoothly.

Students' learning goals: to surpass themselves, embrace the first (growth, is to constantly improve ourselves, and look for more first of ourselves)

As the jinhui member, we understand management produce efficiency; as the jinhui member, we know more about the quality of development. We are deeply aware that “education is the company of the longest love, the cultivation rather than the choice, the fulfillment but not the gain and loss, the path we walk.” I believe that through all the jinhui members’ sustained efforts, Jinhui will become a rising star of education!

Communication and study, embrace the world

Wisdom teaching, data times

Beautiful classroom, show personality
